Whitespace Rule	Empty space makes design breathable.	Don't overcrowd with text.

🧠 QUICK RECALL RULES

🎨 **Color:** 3 Colors Max

🔠 **Font:** 2 Fonts Max

📚 **Text:** 3 Layers (Title, Sub, Extra)

👁️ **Contrast:** Bright vs Dark

⚡ **Focus:** 1 main subject

🕐 **Message:** Understandable in 1 Second

🎨 1️⃣ The Contrast Pairing

- Use **two fonts that look different** but still complement each other.
- Example: one **bold and modern**, the other **simple and classic**.
- ✅ *Rule:* "Contrast, don't clash."

  (Think like pairing tall + short, round + sharp, heavy + light.)

✨ 2️⃣ Less People Stand Out

- Don't use too many fonts — **max 2 per design**.
- The fewer fonts you use, the more **focused** and **professional** your design looks.
- ✅ *Tip:* Use size, weight (boldness), or color instead of adding new fonts.

🔠 3️⃣ Sans Serif for Heading & Serif for Body

- **Sans Serif (clean, modern)** → great for **headings/titles**.
- **Serif (traditional, readable)** → great for **body text**.
- ✅ *Why:* Serif fonts guide the eye across long text; sans serifs grab quick attention.
- Example Pair:
  - Heading → *Montserrat* (Sans Serif)
  - Body → *Georgia* (Serif)

🧠 4️⃣ Steal Like an Artist

- Look at **real-world designs** (YouTube thumbnails, websites, posters).
- Observe what font combinations others use — then **adapt them in your own style**.
- ✅ *Tip:* Use sites like
  - fontpair.co
  - canva.com/font-combinations

⚡ Quick Remember Tip:

Rule	Key Idea
1. Contrast	Mix different but matching styles
2. Limit Fonts	Max 2 fonts per design
3. Serif + Sans	Serif → Readable, Sans → Attention
4. Steal Smart	Learn from others, make it yours
