🎬 What Are MOGRTs?

MOGRTs (Motion Graphics Templates) are pre-made animated templates that include **text, graphics, transitions, or effects**, which can be customized directly inside Premiere Pro — without needing to open After Effects.

🧩 Where You Find Them:

- **Essential Graphics Panel → Browse Tab**
- You can also **import MOGRTs** by clicking the **"+" (Install Motion Graphics Template)** icon at the bottom.

⚙️ Why MOGRTs Are Useful:

1. 🎨 **Saves time** – no need to animate from scratch every time.
2. ✍️ **Customizable** – change text, color, size, position easily.
3. 🔁 **Consistent Branding** – perfect for maintaining uniform titles, lower-thirds, or transitions across videos.
4. 🔌 **Integrated** – works directly in Premiere Pro without switching to After Effects.

🧠 Types of MOGRTs:

1. **Title Templates** – Animated text titles, lower thirds, intros.
2. **Transition Templates** – Smooth transitions between clips.
3. **Social Media Templates** – Like, share, subscribe animations.
4. **Infographics / Stats Templates** – Animated charts and numbers.

🎛️ Customizing MOGRTs:

In the **Essential Graphics panel (Edit tab)** you can change:

- Text content
- Fonts and size
- Colors (for text, shapes, or backgrounds)
- Animation speed (sometimes included)
- Logos or icons (replaceable fields)

💡 Tips for Using MOGRTs Like a Pro:

1. 🔍 Keep your **Essential Graphics Panel** pinned for quick access.
2. 📂 Organize MOGRTs by folders like: “Titles”, “Transitions”, “Socials”.
3. 🎥 Use **keyframes** on position or opacity to fine-tune built-in animations.
4. ⚡ Download from **Adobe Stock** or create your own in **After Effects** → export as .mogrt.
5. 🎯 Always match color and font style with your brand or project tone.

🧰 Create Your Own MOGRT:

1. Open **After Effects** → Design and Animate your text/elements.
2. Select properties you want to make editable (like text or colors).
3. Export as **Motion Graphics Template (.mogrt)**.
4. Import it into Premiere Pro → use it easily like any graphic.
