keyboard shortcuts & premiere pro basics

Premiere Pro Workspaces layouts

1. Editing (Default)
    a. Cut, trim, and arrange clips efficiently
    b. Main panels: Timeline, Program Monitor, Source Monitor, Project Panel
2. Color
    a. Perform color correction and grading
    b. Panels: Lumetri Color, Scopes, Program Monitor
3. Audio
    a. Mix and adjust audio levels
    b. Panels: Audio Track Mixer, Timeline, Program Monitor
4. Assembly
    a. Organize and preview clips before detailed editing
    b. Panels: Project Panel, Source Monitor, Media Browser, Timeline
5. Effects
    a. Apply video/audio effects and transitions
    b. Panels: Effects, Effect Controls, Timeline, Program Monitor
6. Graphics
    a. Create titles, lower-thirds, and motion graphics
    b. Panels: Essential Graphics, Timeline, Program Monitor
7. Libraries
    a. Access Adobe Creative Cloud assets for your project

b. Panels: Libraries Panel, Project Panel for importing assets

Adobe Premiere Pro workspace panels with their **layout and purposes**:

1️⃣ Project Panel

- **Location:** Usually bottom-left.
- **Purpose:**
  - Stores all imported media: videos, images, audio.
  - Organize with **Bins** (folders).
  - Create new **Sequences** from here.
- **Tip:** Right-click → New Bin to keep files organized.

2️⃣ Source Monitor

- **Location:** Top-left.
- **Purpose:**
  - Preview and trim clips **before adding to timeline**.
  - Set **In (`I`) and Out (`O`) points** to select the portion of the clip you want.
  - Can apply effects **before editing into sequence**.

3️⃣ Timeline Panel (Sequence Panel)

- **Location:** Bottom-center.
- **Purpose:**
  - Main area to **assemble your video**.
  - Add **video & audio tracks**.
  - Perform **cuts, trims, ripple edits, and move clips**.
- **Features:**

- **Tracks:** V1, V2... for video; A1, A2... for audio.
- **Snap tool (S):** Align clips precisely.
- **Zoom In/Out:** `=` and keys for detailed edits.

4️⃣ Program Monitor

- **Location:** Top-center.
- **Purpose:**
  - Shows the **final output** of your timeline/sequence.
  - Preview edits in real-time.
  - Add **markers** for important moments in the sequence.

5️⃣ Tools Panel

- **Location:** Usually left of the timeline.
- **Purpose:**
  - Contains editing tools like:
    - **Selection Tool (V)** – Move clips.
    - **Razor Tool (C)** – Cut clips.
    - **Slip / Slide Tool** – Adjust timing of clips without changing duration.
  - Helps perform **precise edits efficiently**.

6️⃣ Effects Panel

- **Location:** Usually top-right.
- **Purpose:**
  - Add **video & audio effects** and **transitions**.
  - Drag effects onto clips in the timeline.
  - Access **Presets** for quick effects.

7️⃣ Effect Controls Panel

- **Location:** Usually above timeline, near Program Monitor.
- **Purpose:**
  - Customize **applied effects** on selected clips.
  - Adjust **motion, opacity, scale, rotation**, color, audio levels, and keyframes.

8️⃣ Audio Meters / Audio Track Mixer

- **Location:** Right side or docked below timeline.
- **Purpose:**
  - Monitor **audio levels** to prevent peaking.
  - Adjust **track volume, panning**, and apply audio effects.

9️⃣ Media Browser (Optional Panel)

- **Purpose:**
  - Browse files on your computer **without importing** first.
  - Drag files directly into Project Panel.

1️⃣0️⃣ Other Panels

- **History:** Undo/redo steps.
- **Metadata:** View clip info.
- **Lumetri Color:** For color grading.

💡 **Workspace Tips:**

- To reset messy layout: `Window → Workspace → Reset to Saved Layout`.
- Switch workspace by task: `Editing, Color, Audio, Graphics`.
- Panels are **dockable** – you can move them anywhere for your comfort.

Keyboard Shortcuts

1️⃣ General Shortcuts

Action	Windows	Mac	Memory Tip
New Project	Ctrl + Alt + N	Cmd + Option + N	"N" for New
Open Project	Ctrl + O	Cmd + O	"O" for Open
Save	Ctrl + S	Cmd + S	"S" for Save
Undo	Ctrl + Z	Cmd + Z	Think "Oops, Undo"
Redo	Ctrl + Shift + Z	Cmd + Shift + Z	Undo's twin
Import Media	Ctrl + I	Cmd + I	"I" for Import
Export Media	Ctrl + M	Cmd + M	"M" for Media Export
Preferences	Ctrl + ,	Cmd + ,	Comma for settings

2️⃣ Timeline Navigation

Action	Windows	Mac	Memory Tip
Play / Pause	Space	Space	Space = Play/Pause
Step Forward Frame	Right Arrow	Right Arrow	→ small step forward

Go to Next Edit	Down Arrow	Down Arrow	↓ next cut
Go to Previous Edit	Up Arrow	Up Arrow	↑ previous cut
Zoom In Timeline	=	=	"=" = zoom in
Zoom Out Timeline	-	-	"-" = zoom out
Toggle Timeline View	\	\	Split view shortcut

3️⃣ Selection & Editing Tools

Action	Windows	Mac	Memory Tip
Selection Tool	V	V	"V" for select everything
Ripple Edit	B	B	"B" for better edit flow
Razor Tool	C	C	Cut like a**C**utter

Rolling Edit	N	N	"N" for next/rolling
Slip Tool	Y	Y	"Y" for slide the clip
Slide Tool	U	U	"U" for moving along timeline
Hand Tool	H	H	"H" for Hand to move
Zoom Tool	Z	Z	"Z" for Zoom
Ripple Trim	Q	Q	“Q” for remove before portion
Ripple Trim	W	W	“W” for remove after portion

4️⃣ Markers & In/Out

Action	Windows	Mac	Memory Tip
Mark In	I	I	"I" for In-point
Mark Out	O	O	"O" for Out-point
Go to In	Shift + I	Shift + I	Jump to In
Go to Out	Shift + O	Shift + O	Jump to Out
Add Marker	M	M	"M" for Marker
Delete Marker	Ctrl + M	Cmd + M	Marker removal

5️⃣ Clip Manipulation

Action	Windows	Mac	Memory Tip
Lift Clip	;	;	Remove but leave gap
Extract Clip	'	'	Remove + close gap
Enable/Disable Clip	Shift + E	Shift + E	Turn clip on/off
Link/Unlink Clips	Ctrl + L	Cmd + L	L for Link
Nest Clips	Ctrl + N	Cmd + N	Nest like project
Duplicate	Alt + drag	Alt + drag	Drag and alt

6️⃣ Audio Shortcuts

Action	Windows	Mac	Memory Tip
Increase Audio	Ctrl +]	Cmd +]	] = louder

Decrease Audio	Ctrl + [	Cmd + [	[= softer
Mute Track	Shift + S	Shift + S	S = silence track
Add Audio Transition	Ctrl + D	Cmd + D	Default transition
Show Audio Keyframes	Shift + K	Shift + K	Keyframes for audio

7️⃣ Effects & Graphics

Action	Windows	Mac	Memory Tip
Effects Panel	Shift + 7	Shift + 7	7 = Effects
Effect Controls	Shift + 5	Shift + 5	5 = tweak effect
Apply Default Transition	Ctrl + D	Cmd + D	D for default
Apply Audio Transition	Ctrl + Shift + D	Cmd + Shift + D	Audio default

8️⃣ Program & Source Monitors

Action	Windows	Mac	Memory Tip
Toggle Full Screen	Ctrl + `	Cmd + `	` = accent key
Step Forward / Back	Right / Left Arrow	Right / Left Arrow	Frame by frame
Export Frame	Ctrl + Shift + E	Cmd + Shift + E	Capture frame

9️⃣ Misc / Workflow

Action	Windows	Mac	Memory Tip
Show / Hide Workspace Panels	Shift + 1…0	Shift + 1…0	Quickly switch panels
Maximize Panel	~	~	Tilde for full screen
Toggle Snap	S	S	S = Snap clips together
Render Effects in Work Area	Enter	Enter	Enter = Preview
