🔍 ZOOM IN / ZOOM OUT (using Keyframes in Effect Controls)

🎯 Purpose

- To **focus** on something (Zoom In) or **reveal** a wider view (Zoom Out).
- Commonly used in **vlogs, tutorials, and cinematic edits**.

⚙️ STEP-BY-STEP (Zoom In)

1️⃣ **Select your clip** → Go to **Effect Controls** panel.

2️⃣ Find **Scale** under the **Motion** section.

3️⃣ Move the **playhead** to where you want the zoom to start.

4️⃣ Click the ⏱️ **Stopwatch** beside Scale → adds the **first keyframe** (starting zoom).

- Example: Scale = **100%**

  5️⃣ Move playhead ahead (1–2 seconds).

  6️⃣ Increase Scale → e.g., **120%** → adds **second keyframe** (end zoom).

  7️⃣ Play the video — your clip **smoothly zooms in** 🎬

🧠 **Tip:**

Right-click keyframes → *Temporal Interpolation* → *Ease In / Ease Out* for **smooth motion**.

🔄 STEP-BY-STEP (Zoom Out)

1️⃣ Do the same process but **reverse the values**:

- Start with Scale = **120%**
- End with Scale = **100%**

  2️⃣ The video will **gradually zoom out**.

💡 Smart Zoom Trick (Without Keyframes)

➡️ **Transform Effect (under Effects → Video Effects → Distort → Transform)**

- Apply it, then keyframe **Scale** and check **Use Composition's Shutter Angle = 180°** for smooth motion blur zooms (cinematic look).

🎬 Quick Remember:

Type	Scale Start	Scale End	Result
Zoom In	100%	120%	Closer
Zoom Out	120%	100%	Wider

✨ Pro Tips:

- Keep zooms subtle (100 → 110%) for natural feel.
- Combine with **Position** keyframes to zoom toward a specific object.
- Use **Ease In/Out** for professional smooth transitions.

🎥 1️⃣ Zoom In – Focus or Attention Moment

📍 **When to Use:**

- To draw attention to a speaker, product, or important detail.

💼 **Example Scenarios:**

- **YouTube tutorials:** Zoom in on text/code for clarity.
- **Interviews:** Subtle zoom on a speaker's expression to emphasize emotion.
- **Product ads:** Zoom in on brand logo or product feature.

💡 **Tip:** Keep it between **100–115%** for natural effect.

🎥 2️⃣ Zoom Out – Reveal or Context Moment

📍 **When to Use:**

- To show the full scene or end a close-up shot.

💼 **Example Scenarios:**

- **Travel vlog:** Start close on the person → zoom out to reveal the landscape.
- **Movie scenes:** Reveal environment for storytelling context.
- **Corporate video:** Show team working after focusing on one person.

💡 **Tip:** Use **Ease Out** keyframe for smooth transition.

🎥 3️⃣ Pan (Position Keyframes) – Movement or Direction

📍 **When to Use:**

- To simulate camera movement or guide viewer's eyes.

💼 **Example Scenarios:**

- **Event videos:** Pan from one speaker to another.
- **Cinematic intros:** Pan across a city skyline.
- **Tutorials:** Pan across screen recordings or slides.

💡 **Tip:** Move Position X values left → right (slow for cinematic feel).

🎥 4️⃣ Dolly Zoom (Zoom + Position) – Dramatic Moment

📍 **When to Use:**

- To create emotional or shocking impact.

💼 **Example Scenarios:**

- **Films:** Use during suspense, realization, or fear moments.
- **Vlogs:** Dramatic reveal moment (e.g., discovering a new place).

💡 **How:** Increase Scale (zoom in) while adjusting Position to keep subject centered.

🎥 5️⃣ Opacity Keyframes – Emotional or Transition Moment

📍 **When to Use:**

- For fading between scenes or emotional storytelling.

💼 **Example Scenarios:**

- **Documentaries:** Fade in/out for calm storytelling.
- **Romantic or memory scenes:** Use slow fade transitions.

💡 **How:** Set Opacity from **0% → 100% (Fade In)** or **100% → 0% (Fade Out).**

🎥 6️⃣ Rotation Keyframes – Creative or Fun Moment

📍 **When to Use:**

- To add energy or emphasize dynamic action.

💼 **Example Scenarios:**

- **Music videos:** Spin transition between shots.
- **Reels:** Quick spin-in/out effects for creativity.

💡 **Tip:** Keep rotation small (±10°–15°) for subtle movement.

🎥 7️⃣ Anchor Point Animation – Unique Motion Pivot

📍 **When to Use:**

- When you want the clip to rotate or zoom from a **specific corner or object**.

💼 **Example Scenarios:**

- **Logo animation:** Spin from corner.
- **UI/Tech videos:** Zoom in from button or element.

💡 **Tip:** Move anchor point before scaling or rotation.

🎥 8️⃣ Combination Motions (Real-World Edits)

Real Scene	Effects Used	Purpose
Interview opening	Zoom In + Opacity Fade In	Emotional emphasis
Product reveal	Zoom Out + Rotation	Dynamic reveal
Travel vlog	Pan + Zoom Out	Show journey feeling
Gaming montage	Scale + Position + Rotation	High-energy transitions
Emotional story	Opacity + Slow Zoom In	Emotional depth

🧠 Quick Remember Trick

🎯 **Zoom = Focus**

🌍 **Pan = Direction**

🎢 **Rotate = Energy**

💫 **Opacity = Emotion**

🎬 **Anchor Point = Style**
